Hefty and Stable, Werzalit is originally a German company that developed a special table top, made of pressed wood-shaving internally and a patented plastic foil covering all the parts.

The quality materials yield a substantial tabletop that will not likely blow over in windy weather or tip easily when bumped. Scratch and Stain resistant Werzalit finishes stay fresh and beautiful year after year.

The easy-to-clean melamine surface resists scratches. Superior heat resistance Werzalit fusion process yields a surface that is superior to laminate: no buckling, lifting, peeling or discoloration! Resists mildew and bacteria unlike other tabletops, Werzalit Tabletops will not discolor, blister, or peel due to mildew or bacteria. Weatherproof ice, snow, wind or rain: Werzalit's finish stands up to conditions that others just cannot endure!
